## New Hardware-Version 1.4.x For Ignition Controllers of the MIC4 and MIC5 Series

With this sales and service bulletin, we would like to inform you that the ignition controllers of the MIC4 and MIC5 series are since Mid of 2014 delivered with the new hardware version 1.4.x. The introduction of the new hardware version does not have any consequences for the use of the ignition controllers.

**When carrying out an update,  
always use the firmware that is  
suitable for your hardware version!**

You can find the hardware version of your MIC4 or MIC5 ignition controller in the view *Runtime Data – Information* in the MICT:

The screenshot shows the 'Runtime Data – Information' window in the MICT software. The 'Hardware Version' field is highlighted with a red box and a red arrow pointing to it, indicating the current hardware version of the ignition controller. The value shown is '1.4.0.19856'.

Section	Field	Value
Device	Device ID	MIC4x2.16 (1.5.1 [0000c801])
	Arrangement Number	422.16.C000-000-AA-4
	Serial Number	01234567
	Bootloader Version	0.26.2.20138
	Firmware Version	0.32.0.20273
Operating Hours	87:16:56.923	
Controller Board	Serial Number	CPU0123456iB
	Hardware Version	1.4.0.19856
Output Board	Serial Number	I/O0123456iB
	Hardware Version	1.3.0.12975
