## VariFuel2 Air/Fuel Ratio Mixer

### Flow Body Size Indicated on Nameplate

The size of the flow body is very important for MOTORTECH service personnel in case you experience problems with your VariFuel2 gas mixer. During operation it is not possible to simply determine the size. In order to identify the flow body, it used to be necessary to dismount the gas mixer. Therefore, the nameplate of the VariFuel2 gas mixer has been modified.

- ① As of now, a label indicating the diameter is in the scope of supply of the VariFuel2 flow body.
- ② This label is placed on the designated field of the nameplate of the VariFuel2 gas mixer during installation.
- ③ This makes all important information on the gas mixer readily available.
