TempScan20 MOTORTECH Temperature Module with 20 Channels

The TempScan20 temperature module monitors up to 20 thermocouples and provides the temperature information to the PowerView3 HMI module via CANopen.

- Channels are independently configurable as Type B, E, J, K, N, R, S or T thermocouples
- Temperature information can include
 - Exhaust temperature
 - Winding temperature
 - Fluid temperature
- No additional programming or configuration required
- Integral diagnostics determine thermocouple integrity
- All channels are fully isolated from the CAN line and from the power supply
- The temperature module features rugged packaging and watertight connectors for an IP65 rating
- Available versions for installation in a control cabinet or built into a stainless steel enclosure
- Full Data visualization through PowerView3 HMI Module

More information on the TempScan20 Temperature Module and the PowerView3 HMI Module is available at <http://www.mortortech.de/download-centere.html> for download.
