MIC3+CATDI Ignition Controller

Retrofit for CATERPILLAR® G3300 and G3400 Series Gas Engines

Based on the MIC3+ series, MOTORTECH produces special controllers as a replacement for the CATERPILLAR® Digital Ignition System used on G3300 and G3400 series gas engines. Designed as an exchange device, the MIC3+CATDI enables a quick conversion without great effort.

Technical Benefits:

- More than double the ignition energy (300 mJ)
- Boost feature with 500 mJ ignition energy for improved starting performance
- Smoother running of the engine
- Improved combustion
- Less wear to engine components
- Manual switch for ignition timing adjustment
- Solution for easy conversion
- No rewiring or mechanical adaptations necessary
- Predefined configuration data can be easily uploaded to the ignition controller
- The available devices include all components for a successful upgrade
- CAN Bus interface for connection of PowerView3 HMI Module for full ignition data visualization
