

## ■ New Product

# MIC3+CEC Ignition Controller

## Retrofit for WAUKESHA® VGF and VHP Series Gas Engines

Based on the MIC3+ series, MOTORTECH produces special controllers as a replacement for the WAUKESHA® CEC Ignition System used on VGF and VHP series gas engines with 6, 8 or 12 cylinders. Designed as an exchange device, the MIC3+ CEC enables a quick conversion without great effort.

### Technical Benefits:

- More than double the ignition energy (300 mJ)
- Boost feature with 500 mJ ignition energy for improved starting performance
- Smoother running of the engine
- Improved combustion
- Less wear to engine components
- Manual switch for ignition timing adjustment
- Solution for easy conversion
- No rewiring or mechanical adaptations necessary
- Predefined configuration data can be easily uploaded to the ignition controller
- The available devices include all components for a successful upgrade
- CAN Bus interface for connection of PowerView3 HMI
- Module for full ignition data visualization
