VariFuel2 
MOTORTECH AIR/FUEL RATIO MIXER

MOTORTECH VariFuel2 Air/Fuel Ratio Mixer – Flow bodies Made of a New Type of Material

In addition to the introduction of the new stepper motor, we would also like to inform you that the flow bodies for VariFuel2 air/fuel ratio mixers with a diameter of 60.0 mm and above are no longer made of aluminum.

Flow bodies of these sizes, which are exclusively used for the VariFuel2 series 200-100 and 200-120, will be made of a thermoplastic material. Its features are high strength, hardness, roughness and dimensional stability, and it reduces the weight of flow bodies of a size of 60.0 mm to 107.5 mm.
