

Technical Training Module 5 Basic ALL-IN-ONE CHP Control

The ALL-IN-ONE is a complete genset or CHP controller. The days when you had to link up several control units to a system are a thing of the past. We have integrated all functions, including lean mixture control, into one system with a large separate display. Link up to 32 modules and connect your plant to the network. Learn how you yourself can make small adjustments to your system!

Key Topics AIO Basic Training

- Set up and function of the NT and NTC controls
- New features of the NTC base box, introduction to new products
- IntelliMonitor/GenConfig user software
- AFR control/introduction to the current software
- Basics – Elementary program (SPI, SPTM)
- Basics – Power management MINT applications
- Basics – Screen editor 8" display & 17" display
- Basics – Communications options

If possible, participants should bring a laptop for use ...

Target Group

This course is geared to technicians, commissioning engineers and programmers who would like to gain a better understanding of the technical aspects of CHP plant control. Our experienced trainers are qualified service technicians who have thorough knowledge about the regular use of the components and provide support on-site on a daily basis.

Objective

Upon successful completion of the training session, participants will be able to implement/create basic programming (SPI / SPTM).

Duration: 2 days (8:30 a.m. – 4:30 p.m.)

Price: 440.00 € per participant
(includes training materials, lunch snack, hot and cold beverages)
