

Technical Training Module 6 Advanced ALL-IN-ONE CHP Control

The ALL-IN-ONE is a complete genset or CHP controller. The days when you had to link up several control units to a system are a thing of the past. We have integrated all functions, including lean mixture control, into one system with a large separate display. Link up to 32 modules and connect your plant to the network. Learn how to program the system yourself!

Key Topics AIO Advanced Training

- Advanced basics (SPI/SPTM)
- Advanced power management (MINT)
- Advanced screen editor 8" & 17" display
 - Stand-alone operation
 - Load management
 - MCB, MGCB, GCB
 - Virtual connections
 - IntelliMains in the network

Prerequisite for participation is the successful completion of module 5!

If possible, participants should bring a laptop for use ...

Target Group

This course is geared to commissioning engineers and programmers who would like to gain a better understanding of the technical aspects of CHP plant control. Our experienced trainers are qualified service technicians who have thorough knowledge about the regular use of the components and provide support on-site on a daily basis.

Objective

Upon successful completion of the training session, participants will be able to program an entire MINT application (multi-module plant) and bring it online.

Duration: 2 days (8:30 a.m. – 4:30 p.m.)

Price: 440.00 € per person
(includes training materials, lunch snack, hot and cold beverages)
