

MAN® E3262 LE202

DENSO

RUNTIME STORIES

1,500 Hours Still Running

DENSO® GE2-3, M14x1.25 J-type spark plugs (Ir/Ir) with 0,75 inch thread reach and 13/16 inch HEX provide reliable combustion for over 1,500 hours* in a MAN® E3262 LE202 gas engine without any misfiring. The DENSO® GE2-3 outlast competitive spark plugs (BERU® 14R4-DIU3/DENSO® GE3-5) by a **factor of 2**.

- 1 Longer ceramic insulator offers best flashover protection
- 2 Integrated stress resistant monolithic resistor suppresses electromagnetic interference (EMI)
- 3 J-type electrode design and use of higher erosion resistance materials
- 4 Center electrode with laser welded Iridium alloy pad and special AirGap technology
- 5 Protruding ground electrode with copper core and laser welded Iridium pad

GE2-3 is recommended to replace DENSO® spark plugs GE3-5 and BERU® spark plugs 14R-4DIU2/14R-4DIU3/14GZ-LL/-LL2.

* Note: Running hours may vary due to application type and accessory equipment installed.
