

ITB-DC – Throttle with Integrated Stepper Motor Driver

New Firmware — Release 2.2.0

Firmware 2.2.0 is a release for all MOTORTECH throttles of the ITB-DC series. For testing and development purposes of the ITB-DC throttle with firmware 2.2.0, at least MICT 2.50.1 must be installed on the PC.

In order to update the the ITB-DC throttle, please read the latest assembly instructions which are available for download at <https://www.motortech.de>. Check your settings prior to starting your engine.

Download

The new device firmware, all current assembly instructions and a current MICT can be downloaded from the MOTORTECH Download Center:
