

Product Information

Discontinuation of Exchange Program Throttle Bodies on MAN® Engines

MOTORTECH declares that the Exchange Program for Throttle Bodies on MAN® Engines will be discontinued on **30.06.2021**.

The Sales and Service Bulletin **No. 2016/35** will therefore become invalid.

Stay up to date and use our alternatives! For example:

ITB Throttle Bodies with Integrated Stepper Motor

Within a speed control system, a throttle body is used to regulate the supply of the gas/air mixture and thus the speed and power of a gas engine.

MOTORTECH ITB throttle bodies are equipped with an integrated stepper motor, which eliminates the use for an external actuator. The stepper motor is extremely precisely actuated by the VariStep3 stepper motor driver in combination with the SC100 speed controller.
