VariStep3 Stepper Motor Driver
Design change and new part number 31.01.980

MOTORTECH is pleased to announce the latest design change and new part number for VariStep3.

The Stepper Motor Driver with the new part number P/N: 31.01.980 is available to order and will replace the predecessor P/N: 31.01.960.
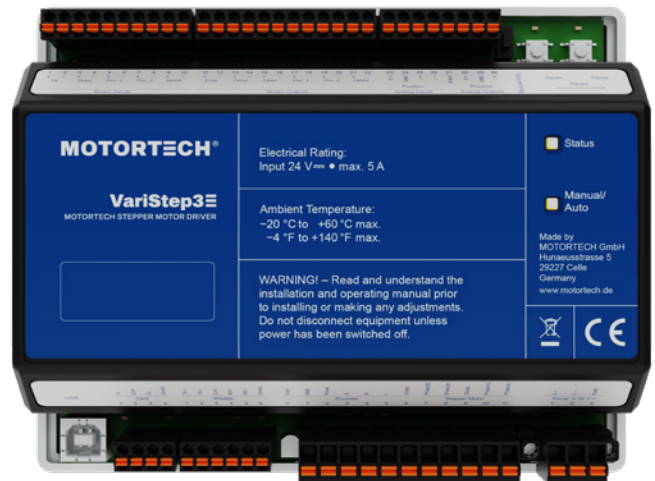

All new orders placed with MOTORTECH will automatically be updated to the new part number. Existing orders will continue to be supplied with the remaining stock of the old number as long as the delivery batches match.

The VariStep3 P/N: 31.01.980 is fully compatible with its predecessor in terms of connectors, inputs / outputs, functionality and software settings. Actual Firmware 1.0.2 and Hardware 1.06 remains unchanged. The design change affects the housing material and backplate design as new parts.

The operating instructions (PDF) and MICT PC software 2.46.1 can be found on the USB stick included in the product packaging. A USB connection cable to the laptop is not included but can be ordered as an option.

The latest MICT Software 2.46.1 version is available via the MOTORTECH download center:
