

# DENSO® Spark Plug

## Part Number Update Information

In January 2024, MOTORTECH notified customers (Sales & Service Bulletin 2024/05) that spark plug types GE3-5 and GK3-5 are once again available with the standard with which they were commercially available until June 2022.

DENSO® has now recently announced that the following spark plug types will also soon be available again with the respective standard before June 2022:

- GI3-1
- GI3-3
- GL3-1
- GL3-3
- GT3-1

The upcoming change involves a return to the originally used center and ground electrodes (Ir/Pt). The geometry of the spark plug types mentioned, as well as the initial gap setting, will remain the same as their predecessors.

Any open sales orders with MOTORTECH will automatically update to the newly released part numbers once available.

The information below identifies how to differentiate between obsolete/ available spark plugs.
