

■ Technical Training

Module 4

ALL-IN-ONE CHP Control for Beginners

The ALL-IN-ONE is a complete genset or CHP controller. The days when you had to link up several control units to a system are a thing of the past. We have integrated all functions, including lean mixture control, into one system with a large separate display. Connect up to 32 modules and connect your plant to the network.

This control unit is on par with a large SPS system but at a much more affordable price!

Key Topics AIO Entry-Level Training

- Basic information for operators and technicians
- Set up and function of the AIO.GAS and AIO.NTC controls
- New features of the AIO.NTC base box, introduction to new products
- InteliMonitor/GenConfig user software

If possible, participants should bring a laptop for the practical exercises.

Target Group

This course is geared to technicians, commissioning engineers and CHP operators who would like to gain a better understanding of the technical aspects of CHP plant control.

Our experienced trainers are qualified service technicians who have thorough knowledge about the regular use of the components and provide support on-site on a daily basis.

Objective

Upon successful completion of the training session, participants will be able to use the basic functions of the control unit and identify common faults using the user software.

 Duration: ¾ days (8:30 a.m. – 1:30 p.m.)

 Price: 160.00 € per participant (includes training materials, lunch snack, hot and cold beverages)
